## LETTER OF SUPPORT

Fejér County Chamber of Architects is pleased to express its support for the proposed project “RetrofitLab” being developed by the Municipality of Székesfehérvár and its partners under the European Urban Initiative (EUI).

As an organisation committed to the preservation and promotion of architectural heritage, quality urban development, and the sustainable renewal of the built environment, we recognise the importance and relevance of the project’s objectives. The initiative addresses a significant challenge faced by many historic cities: how to improve the energy performance, functionality and long-term viability of heritage buildings while preserving their cultural and architectural values.

Although our organisation will not participate as a formal project partner, we are familiar with the project concept and support its overall goals and proposed direction. Subject to our available capacity and internal procedures, we are willing to contribute to the project through professional discussions, knowledge sharing, providing feedback and supporting the dissemination of project results within our professional network where appropriate.

Yours sincerely,

Hungary, Székesfehérvár, 05 June, 2026

Karé Krisztián  
President of the FÉK
